

Electronic Environments—Your Data Center Experts

Design and Construction

Services for Mission-Critical Environments

Additional Mission Critical Capabilities:

Site Services

Preventative Maintenance

Emergency Service

Infrastructure Manager

Predictive Maintenance

Value-added Services

Data Center Energy Efficiency & Cooling Solutions

Air Management

Power Management

Monitoring

Maintenance Tuning

Flexible Design & Construction Services

When building or modifying a technology dependent facility like a data center you need a specialized mix of talent including: architectural, engineering, mechanical, electrical, and project management expertise. Most general contractors are great at what they do, but data centers require specific expertise from design to build-out.

Electronic Environments Corporation (EEC) has this rare combination of skills in-house, and understands the special requirements of mission-critical facilities; from the raised floors to precision cooling and redundant power demands. Our scalable, flexible and modular design concepts ensure a cost effective long term investment; we incorporate today's needs with tomorrow's technology in mind.

EEC's design and construction services can be customized to meet

Design & Construction Services Include:

- **Design**
- **Engineering**
- **Construction**
- **Installation Services**
- **Data Center Power & Cooling Assessments**

your needs, so you have the level of control that makes you comfortable. We can manage complete turnkey projects from conception design and site selection to construction and project management; or just a specific piece of the overall project.

EEC's solutions are guaranteed to meet your current needs and your organization's long-term operational goals. Since 1986, our team has been ensuring reliable facilities are built on time and on budget to your specifications.

Critical Design / Construction Capabilities

Electronic Environments' solutions are guaranteed to meet your current needs and your organization's long term operational goals. Since 1986, our team has been ensuring reliable facilities are built on time and on budget to your specifications.

Design Engineering

- Programming / Needs Assessment
- Site Selection & Analysis
- Architectural Space Planning
- Data Center Design
- Electrical and Mechanical Engineering

Construction Management

- Project Management
- Scheduling
- Estimating
- Electrical Contractin
- Mechanical Contracting
- General Contracting
- System Startup

Facility Engineering

- Maintenance Programs
- Standard Operating Procedures
- Quality Assurance & Infrastructure Training
- System Analysis
- Power & Cooling Assessments
- Computational Fluid Dynamics
